

WHITE LOFT

CAMPIONPLATT

WHITE LOFT

NEW YORK CITY

The transformation here was a study in white. Employing large scale sculptural elements like the fireplace, entry and kitchen the loft was transformed into a series of rooms within rooms. The white lacquer cabinets take on the color hue of the state-of-the-art LED lighting system that morphs the apartment ambience from one mood to the next. All the furniture was custom tailored to the resulting rooms. With three terraces and a yoga room, the loft is family made.
